

Thank you for sharing your Adventures with Aha! this summer!  
Print out this image of Aha! and bring him with you on your travels.  
Take a picture of him in an interesting place and share it with us at  
[www.creativity.org/ahamoments](http://www.creativity.org/ahamoments).

**Here are some helpful tips when photographing:**

**THINK BEFORE YOU CLICK:** Think about what you are looking at and why you are interested. The camera won't decide for you—it's just a tool!

**USE NATURAL LIGHT:** Photographers are always out taking pictures before the sun comes up, and long after it goes down to get the perfect light for their pictures.

**FULL FRAME:** Arrange your picture by thinking about the objects that surround the subject of your photograph. Fill the whole frame with interesting elements.

**CHANGE YOUR PERSPECTIVE:** Be creative by getting down on your stomach or carefully climb a tree to see things from a new angle. Photographs are a great way to show friends and family how you see the world.

**KEEP SHOOTING:** Don't spend too much time looking at the pictures on your digital camera, it uses up the batteries quickly!

**HAVE FUN:** We hope you enjoy this project and look forward to learning about your adventures!
