

# Sustainability Hunt Part #1

**How to play:** Go out into your community and take photos of places, people, or items that embody the first 9 Good Life Goals for a more sustainable future! You can use our photos as an example or decide to take a picture of something entirely different. Learn more about the **Good Life Goals** and see hints for possible photos that could match each goal on the back of this page.

☐ Help End Poverty

☐ Eat Better

☐ Stay Well

☐ Learn and Teach

☐ Treat Everyone Equally

☐ Save Water

☐ Use Clean Energy

☐ Do Good Work

☐ Make Smart Choices

# Sustainability Hunt Part #1

What is Sustainability? Sustainability is supporting healthy people, communities, and environments now and in the future. A great way to live a more sustainable life is by following the **Good Life Goals** and learning about how others are improving their lives and communities through the goals.

Use these **Good Life Goal** descriptions to help you find photos to match each goal!

## 1) Help End Poverty

Find a place where lots of people can live together. This might be an apartment complex, a homeless shelter, or some other place that you think could help house those without a roof over their heads.

## 2) Eat Better

Find a place where food can be grown or where you can get fresh fruits and vegetables. This might be a community garden, farmer's market, or grocery store that carries local produce.

## 3) Stay Well

Find something that teaches people to be safe or help others stay safe. This might be a sign for wearing a mask, a reminder to wash hands, or something else about health that you think fits.

## 4) Learn and Teach

Find a place where people in your community can learn. Maybe it's your school or your favorite museum!

## 5) Treat Everyone Equally

Think about a person that takes care of you or your family? Take a portrait of this person to make them feel special!

## 6) Save Water

Find a body of water and think about all of the living things that use that water. This could be the ocean, a river, a lake, or a pond.

## 7) Use Clean Energy

Find something that generates clean and renewable energy. This may be a solar panel on a roof, a wind turbine, or anything else that uses something other than fossil fuels. You may be surprised how many clean energy alternatives that you can find in your community!

## 8) Do Good Work

Find a locally owned business that you love. It might be one of your favorite shops or restaurants.

## 9) Make Smart Choices

Find something innovative that everyone in your community can use to make their lives better. This might be infrastructure to support communications, public transportation, or clean water in your neighborhood.

**When you're done, make a digital or print collage and reflect on all of your photos. Were you inspired to think about the future of your community by what you found? Did you discover something new that you believe is important for your community to thrive?**
